EDUCATION

B.S. Computer Science, Minor in Data Science | **University of Rhode Island**

Expected May 2028

- **GPA:** 3.92/4.0 · Dean's List (all semesters) · **Specialization:** Artificial Intelligence
- **Coursework:** Data Structures, Algorithms, Software Engineering, Applied Machine Learning, Linear Algebra

TECHNICAL SKILLS

Languages: Python, Java, C++, Dart, HTML/CSS, JavaScript

AI & Data: LLM Integration, RAG Pipelines, AnythingLLM, Multimodal/Vision Models, Multi-Agent Systems, Gemini API, Pandas, NumPy

Tools & Platforms: Git/GitHub, Firebase, ServiceNow, Google Calendar API, Discord API, Microsoft Azure, SSH

Concepts: REST APIs, Object-Oriented Programming, Production Deployment, Agile/Scrum

EXPERIENCE

Software Engineering Intern | **University of Rhode Island (Kingston, RI)**

May 2026 – Aug 2026

- Built an automated ETL pipeline using Python and ServiceNow's REST API to sync and re-index institutional knowledge base articles weekly into an AnythingLLM RAG system.
- Engineered a multimodal pipeline that sends user screenshots to a vision LLM, extracting visual context and appending it to prompt queries.
- Integrated direct ServiceNow ticket context injection and multi-turn conversational history into the Discord bot, eliminating manual issue summarization.
- Improved staff workflows by replacing third-party spreadsheets with Discord-native, role-restricted emoji approval gates and deploying a collision-detection system for active tickets.

IT Student Consultant | **URI IT Service Desk (Kingston, RI)**

Oct 2025 – Present

- Provide technical support to students and faculty across URI's campus.
- Resolve hardware and software issues using Microsoft Azure, ServiceNow, and proprietary campus systems.
- Maintain detailed ticket records and escalate complex issues through proper channels.

Barista / Closing Shift Lead | **Phantom Farms (Cumberland, RI)**

Mar 2024 – Sep 2026

- Managed team workflow, supervised and directed shift staff and responsibilities.
- Delivered high-quality customer service in a fast-paced retail and food service environment.
- Handled end-of-day closing procedures and daily cash deposit reconciliation.

Technology Intern | **New England Institute of Technology (East Greenwich, RI)**

Jul 2024 – Aug 2024

- Assembled, repaired, and deployed institutional desktop/laptop hardware and updated lab infrastructure.

PROJECTS

Super Simple Stocks | **Hackathon Win - URI / Yconic / MLH (Kingston, RI)**

Feb 2026

- Won Best Use of Gemini API at a competitive hackathon hosted at the University of Rhode Island.
- Integrated Google Gemini and Finnhub APIs in a multi-agent architecture to build an AI-powered investing tool.
- Collaborated with a team to design, develop, and demo a working product in under 36 hours.

Hytale Class System Mod | **Java**

Personal Project

- Developed a Java mod that lets players choose a class, each granting its own gear loadout and special abilities.
- Structured classes and abilities with OOP so new classes can be added with minimal code changes.

Roguewordle | **JavaScript, HTML, CSS**

Personal Project

- Designed and built a roguelike variant of the popular word game Wordle, hosted on GitHub Pages.
